BoardRent

The Board Game Rental Platform

User Management & Profile — Requirements

March 2026

Module	User Management & Profile
Status	Final

1. Scope

This module covers everything related to user identity and account management on the BoardRent platform: creating an account, signing in, managing a profile, and administering other users.

Two sections of the profile are reserved for future use and appear as placeholders in this version:

- Bookings History — will display the user's rental history once the bookings feature is available
- My Listings — will display the user's posted listings once the listings feature is available

Out of scope: game listings, bookings, reviews, payments, and notifications.

2. Features & Requirements

Each feature below describes a distinct piece of functionality from the user's perspective. The requirements table under each feature lists what must be true for that feature to be considered complete. Priority: High = must be done for this assignment, Medium = important but can slip, Low = placeholder for a future sprint.

2.1 Creating an Account

Account Registration	A new visitor can create a personal account on the platform so they can start using the app.

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-001	A visitor can register by providing a display name, a chosen username, an email address, a password, and a password	**High**	

	confirmation. All of these except phone number are required to complete registration.		
UM-002	A display name must be between 2 and 50 characters long.	High	
UM-003	A username must be between 3 and 30 characters and may only contain letters, numbers, and underscores.	High	
UM-004	Each account must have a username that is unique across all accounts. No two users can share the same username.	High	
UM-005	Each account must have an email address that is unique across all accounts. No two users can share the same email.	High	
UM-006	A password must be at least 8 characters long and contain at least one uppercase letter, one number, and one special character.	High	
UM-007	The visitor must enter their chosen password twice. Registration is only allowed if both entries match.	High	
UM-008	A phone number may optionally be provided during registration. If provided, it must be a valid phone number format.	Low	
UM-009	If any required field is missing or does not meet its rules, the user is shown a clear error message directly next to that field. They are not redirected away from the registration screen.	High	
UM-010	If the chosen username or email address is already in use, the user is told which one conflicts so they can correct only that field.	High	
UM-011	Once registration is complete, the user is immediately signed in and can access the app. No email confirmation or extra steps are required.	High	

2.2 Signing In

Sign In	A registered user can access their account by signing in with their credentials.

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-012	A user can sign in using either their username or their email address combined with their password.	High	
UM-013	After a successful sign-in, the user is taken to the main area of the app and their name and role are shown throughout.	High	
UM-014	If sign-in fails for any reason, the user is shown a single generic message that the sign-in was unsuccessful. The message does not reveal whether the username, email, or password was the cause.	High	
UM-015	After 5 consecutive failed sign-in attempts on the same account, that account is automatically locked for 15 minutes.	High	
UM-016	While their account is locked, a user who attempts to sign in is shown a message explaining the lock and the exact time remaining until they can try again.	High	
UM-017	A user can tick a 'Remember me' option on the sign-in screen. When selected, their username is pre-filled the next time they open the app so they do not have to type it again. Their password is never saved.	Medium	

2.3 Recovering Access

Forgotten Password	A user who cannot remember their password can get help to regain access to their account.

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-018	A 'Forgot password?' option is visible on the sign-in screen at all times.	**High**	
UM-019	When a user selects the forgotten password option, they are shown a message explaining that they need to contact an administrator to have their password reset. Contact details or instructions are included in the message.	**High**	
UM-020	After an administrator resets a user's password, the user can sign in immediately using the new password without any additional steps.	**High**	

2.4 Signing Out

Sign Out	A signed-in user can end their session and secure their account.

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-021	A sign-out option is accessible from anywhere in the app at all times while the user is signed in.	**High**	
UM-022	After signing out, the user is immediately returned to the sign-in screen. They cannot navigate back to any protected part of the app without signing in again.	**High**	
UM-023	When a user successfully changes their password, they are automatically signed out straight away and must sign in again using their new password.	**High**	

2.5 Managing Your Profile

Profile Management	A signed-in user can view and update the personal information stored on their account.

Personal details

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-024	A user can view all the information stored on their account at any time: display name, username, email address, phone number, and profile picture.	**High**	
UM-025	A user can update their display name, email address, and phone number at any time. The same format and length rules that apply during registration apply here too.	**High**	
UM-026	A user's username is shown on the profile page but cannot be edited after the account has been created.	**High**	
UM-027	When a user saves changes to their personal details, the updated information is reflected on the screen immediately.	**High**	

UM-028	If a user tries to save an email address that is already used by another account, they are told the address is already taken.	High	

Profile picture

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-029	A user can upload an image file as their profile picture.	Medium	
UM-030	Only image files are accepted for the profile picture. If a non-image file is selected, the user is shown a clear error.	Medium	
UM-031	Before the upload is confirmed, the user is shown a preview of how the picture will look on their profile.	Medium	
UM-032	A user can remove their current profile picture at any time. When removed, a default placeholder image is shown in its place.	Low	

Password

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-033	A user can change their password from their profile settings.	High	
UM-034	To change their password, the user must enter their current password first. If the current password entered is wrong, the change is rejected and the user is told it was incorrect.	High	
UM-035	The new password must meet the same strength rules defined in UM-006. The user must enter it twice and both entries must match.	High	

Bookings & Listings (placeholders)

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-036	A Bookings History section is present and visible on the profile page. In this version it displays a message indicating the feature is coming soon.	Low	
UM-037	A My Listings section is present and visible on the profile page. In this version it displays a message indicating the feature is coming soon.	Low	

2.6 Managing Users (Administrator)

User Administration	An administrator can oversee all accounts on the platform and take action on them when needed.

Roles and access

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-038	Every account on the platform has one of two roles: Standard User or Administrator.	High	
UM-039	Administrator accounts have access to the user management area. Standard users do not.	High	

UM-040	If a standard user attempts to reach the user management area, they are shown a message that they do not have permission to access it.	High	

User overview

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-041	An administrator can view a list of all registered accounts. For each account the list shows the display name, email address, username, and current status (active or suspended).	High	
UM-042	The user list can be browsed when there are many accounts, so that the screen does not become unusable with a large number of users.	Medium	

Account actions

ID	Requirement / Acceptance Criterion	Priority	Owner
UM-043	An administrator can suspend any user account. A suspended account cannot be used to sign in.	High	
UM-044	When a suspended user attempts to sign in, they are shown a message clearly stating that their account has been suspended.	High	
UM-045	An administrator can lift a suspension on any account, restoring the user's ability to sign in.	High	
UM-046	An administrator can reset the password of any account. The user can then sign in with the new password the administrator sets.	Medium	
UM-047	An administrator can manually unlock any account that has been locked due to too many failed sign-in attempts, without waiting for the 15-minute period to expire.	Medium
